

● FOR ENTREPRENEURS

A fundable company you *didn't have to build alone.*

We act as your founding team for sixteen weeks, and step back when yours is built. Co-founders for the first run, not a vendor for the long haul.

Idea is sharp. Runway is real. The team isn't built yet, and waiting four months to hire it costs you the window. You need partners who behave like co-founders for sixteen weeks and hand off clean.

WHAT WE SHIP: ALL FIVE, ONE ENGAGEMENT

- 01

AI-native v1 product
Full-stack build, paying users by week 14. Not a prototype. A product running in production.
- 02

Multimodal customer interface
Chat, voice, avatar from day one. Built into v1, not bolted on later.
- 03

Founding-stage brand identity
Visual system, logo, type, design language. The thing investors look at while you talk.
- 04

Investor-grade pitch + landing
Deck, landing page, one-pager. Built to close meetings, not impress consultants.
- 05

First-1000-users CX
Agents covering onboarding, support, ordering, running 24/7 until you hire your first ops person.

THE ENGAGEMENT

Two AI shepherds embedded as **co-founders**, building directly, and leading the team we bring in when the build needs more hands. Weekly working sessions; daily progress visible in your tools.

12-16 WEEKS	2 AI SHEPHERDS	5/5 DELIVERABLES
-------------	----------------	------------------

Product, brand, customers, and a deck, plus a clear handover to the team you've hired by then. A fundable company you didn't have to build alone.
