

● FOR THE INTRAPRENEURS

A unit-level win
you can *defend at
the next review.*

Central IT can't move at your speed. We ship at yours, and clear procurement on the way out the door.

Central IT is booked. Your QBR is not. You have budget and a mandate, and you need a partner who ships at your speed and clears procurement on the way out the door.

WHAT WE SHIP: BUILT TO DEFEND AT REVIEW

- 01 **Vertical AI tool**

A purpose-built agent for your unit's specific function. Not a horizontal platform, the thing your team actually does.
- 02 **Unit command centre**

KPIs, blockers, agent outputs in one view. The dashboard you bring to QBR, in the language your boss uses.
- 03 **Intake & qualification agent**

A 24/7 front-door for inbound work. Filters, qualifies, routes, schedules. Your team stops being the queue.
- 04 **Live signal agent**

Alerts on your unit's metrics, not weekly reports. You hear about the spike when it's still a spike.
- 05 **Procurement-ready architecture**

Vendor questionnaires, security docs, data-handling, audit trail, assembled before procurement asks.

THE ENGAGEMENT

Two AI shepherds working **with your unit's lead**, delivering directly, and leading the delivery team behind us when scope demands. We document everything to procurement-grade as we go.

10-14 WEEKS	2 AI SHEPHERDS	QBR READY
-------------	----------------	-----------

A unit-level win you can defend at the next review. The flock is fenced inside your unit's scope, the dogs are watching, the wool is yours. IT signs off because we built for their checklist from day one.
